

The new Customer Help Center pulls together the best of the previous support portals from both Thales and Vormetric whilst also offering you improved functionality and features. It will give you full access to our knowledgebase of support articles as well as the ability to easily log new support calls with our global team of experts. Simply selecting the '**follow**' button inside a product section on the Help Center will subscribe you to any changes and ensure that you automatically receive update notifications regarding those products as soon as they are released.
